

Learnings

This Project helped me to learn how to approach a Problem, the way to handle it.

Learned how to understand and breakdown a problem, gather requirements, use the available resources accordingly.

Understood how the work flow should be arranged for completing a task.

Technical Skills

- Learned how to use subprocess module.
- Gained experience with Gemini Api key and its integration in code.

Problem Solving

- Faced difficulty in gathering api key and using it, but resolved after using gemini api key.

Project Management

- Learned how to organize the code.
- How to break down the code into smaller one.
